

INSTITUTIONAL & REGULATORY REFORM | PROJECTS

Gide offers market-leading experience advising governments, public companies and international financial organisations on institutional and regulatory reform. Gide lawyers have extensive experience in amending and drafting legislation, including PPP and foreign investment-related laws and regulations and project-specific authorisations, as well as establishing new institutional bodies and industry regulators. The breadth of their practice experience gives them a unique perspective on institutional and regulatory issues, which guarantees efficient and dynamic assistance to comprehensively answer clients' concerns when advising an authority or government.

As a proof of their unparalleled insight in the field, Gide lawyers have played an active role as members of the UNCITRAL panel of experts for drafting the Legislative Guide on Privately Financed Infrastructure Projects (2000) and its Addendum on Model Legislative Provisions (2003). These are currently used by legislators in most countries to elaborate their PPP legal framework and draft the corresponding legal provisions. Our lawyers' comprehensive legal knowledge and wide-ranging experience give authorities and governments the edge they need to succeed in their institutional and regulatory reforms. In this respect, the fact that Gide lawyers have been chosen by the following countries to draft their PPP/Concession Laws speaks for itself: **Iraq** (2010), **Jordan** (2010), **Egypt** (2010), **Albania** (2007), **Kuwait** (2006), **Senegal** (2003), **Croatia** (2002), **Slovenia** (2002), etc.
